Heritage Color is a technology leader in dispersions, utilizing cutting-edge nano mill and blending technology to achieve superior dispersion performance. Customer R&D efforts are supported by a team of experts with dedicated labs and pilot scale equipment ensuring success for our customers.

Quality of Product:

Our technical staff bring years of experience in the field of pigments and dispersion technology.

- Excellent long term stability
- Suitable for manual and automatic dispensing equipment
- Specialty colorant development for your specific requirements available through our R&D labs
- Packaged to fit your manufacturing requirements
- Strong dedicated global supply chain
- Manufactured in our state-of the art facility in Savannah, GA
- Stringent quality assurance
- Optimal pigment color development
- Maximum color strength

Quality of Service:

Our US laboratories evaluate each batch with standardized test methods that follow customer specific applications to ensure consistency that meets our customers’ quality, safety and environmental requirements. In addition, we provide.

- Strong Technical support
- Pigment dispersion recommendations
- Problem solving
- Custom Color Matching
- Toll Manufacturing
- Customer Service
- Stocked inventory
- Logistical Support
